

# AXIAR

Manage Your  
Business Critical Output

As a valued LBM customer, LBM is pleased to offer a valuable upgrade opportunity to you. LBM has recently enhanced its product line by adding major new capabilities to the core products and integrating a robust document archiving and retrieval component. The complete LBM output management suite is branded under the name **AXIAR**.

**Upgrading to AXIAR easily transitions your print-centric processes to online and digital based delivery destinations.**

UniQue Print Annual Support and Update Service customers in good standing can upgrade to **AXIAR Deliver: Print** at no cost. In addition, LBM Systems is offering aggressive price discounts for expanded output object support for **AXIAR Deliver**. Typical non-printer output objects include cluster printing systems, email gateways, fax gateways, storage servers and other online document and information output destinations. For customers who migrate to **AXIAR Deliver** by December 31<sup>st</sup>, 2003, LBM offers a 25% license discount off all other output object license extensions. Contact LBM to discuss how you can benefit from this offer.

Forms&Fonts, Check-Out and eForms&Fonts Annual Support and Update Service customers in good standing will benefit from **AXIAR Format's** new GUI Form Composer, which simplifies form creation. There is a nominal charge for upgrading to **AXIAR Format**, because the Composer is an entirely new feature set exclusively available with **AXIAR Format**. The total upgrade fee for **AXIAR Format** including the new **AXIAR Form Composer** is US \$675.

In order to best support future product development, LBM Systems will terminate support for UniQue 4.1 (and earlier versions) and Forms&Fonts/Check-Out/eForms&Fonts 6.04 (and earlier versions) on September 30<sup>th</sup>, 2004.

To realize the benefits of an integrated output management solution today and take advantage of this valuable opportunity, call (203) 966-0661 or visit [www.LBMsys.com](http://www.LBMsys.com).
